

# PROJECT SHOWCASE

## LINQ APARTMENTS

LINQ Apartments is an exciting new high-rise development recently completed in Northbridge, WA. The development was designed to provide a resort-style oasis amidst the busy lifestyle of this inner city suburb of Perth.

With an integrated architectural design, this contemporary development features 2 buildings of 8 storeys each. The central showpiece of Linq is an expansive, fully landscaped garden, which seamlessly links the development's 2 towers with the heated pool and gymnasium, creating a genuine eco-resort feel.

Designed by S S Chang Architects, DecorSlat ceiling by Decor Systems was specified for the main lobby of the apartment building. To compliment the overall resort feel of the building, the versatile and earthy Western Red Cedar timber finish was chosen.
