- DecorTile
- DecorSolid
(Unperforated Decorated Panels)

Textile finishes to unleash your imagination.

Capture the warm and comforting ambience that only fabric can provide. DecorTouch bonds thousands of tiny fabric fibres to give the magnificent look and feel of a stunningly sculpted fabric surface.

- Select from our myriad of standard colours or create your own.
- Soft velvety touch.
- The variety of perforation patterns and shapes (including panel edge profiles) that DecorTouch can be applied to, is virtually limitless.
- Beauty without visible seams.
- Little restriction in panel thickness allows for impressive definition.
- Dramatically increases acoustic performance.
- Unperforated panels can also be finished in DecorTouch: matching or contrasting allows the whole interior to be coordinated.

ALL TIMBERS USED IN THE DECOR CLEAR RANGE ARE GECA APPROVED
[Good Environmental Choice Australia]

Nothing equals the warmth and character of Decor Clear Coatings onto genuine timber veneer.

Combine Decor’s range of true timber veneers with your engineered acoustics and you have the complete pre-finished package for fast installation as well as significant construction savings.

- 'Natural' range exhibits all the natural beauty of premium timber panels.
- Because our timbers are subject to the marvels of nature, variations in colour, texture and grain occur from panel to panel. The individuality of timbers is one of its most appealing aspects.
- Decor Systems also supplies a magnificent range of manufactured veneers that give a more consistent appearance whilst retaining the ambience of timber.
- Our manufactured veneers from plantation managed trees are crafted, colour enhanced, moulded and sliced to produce a handsome array of timber finishes without the “irregularities” of natural timber.
- Custom veneer options available on request.

* Swatches are to be used as a guide only. See back page for details.

Challenge the boundaries of your design.

Welcome to a new design dimension. Verdigris? Antique Bronze? Brushed Stainless Steel? All of these and more have been created with the advent of DecorMetl. True to life metal finishes boasting amazing durability, enormous flexibility and at much less cost than the real thing.

- Rise to a new level of aesthetics and acoustics.
- DecorMetl applies semi-precious metals (including copper, brass, bronze and stainless steel) in liquid form to your chosen Decor panel.
- DecorMetl offers literally dozens of different metal finishes.
- Hand-finishing with specialised techniques provides unlimited finish combinations.
- Panel edges, rebates and free-flowing forms are seamlessly coated.
- Fully customised service.

(Unperforated Decorated Panels)

Unlock visual dynamics like never before.

DecorKote’s revolutionary coating process provides a stylish, hardwearing and exceptionally tough finish, seamlessly applied to all surfaces regardless of whether they are regular, profiled or free-flowing shapes.

- Natural “micro-stipple” texture and film hardness produces an extremely low maintenance surface that is easy to keep in pristine condition.
- A palette of 17 standard colours plus a virtually unlimited range of custom colours and finishes including metallics, pearls and hammer tones.
- Environmentally responsible finish: releases almost no volatile organic compounds (VOCs) and produces negligible waste throughout the coating process.

* Swatches are to be used as a guide only. See back page for details.

The fresh, vibrant and alive beauty of nature.

DecorImage provides a striking array of timber-grain, metal and stone finishes in a stunning selection of nature-inspired textures and colours, to deliver a finish that's delightful to the eyes and maintenance free for year after year of visual impact.

Totally integrated pre-finished panel system matches or contrasts with Decor's many styles within our perforated ranges.

- Economical alternative to natural materials with cost savings up to half of natural counterparts.
- Ability to seamlessly continue the finish onto our profiled edge options.
- Ability to customise panel size, thickness and secret fixing details.
- Low cost upfront plus additional savings by eliminating on-site coatings and reducing construction time.
