

DecorSorb

Integrated Acoustic Textile Backing

THE CONCEPT

- DecorSorb is an acoustic textile that is heat bonded to the rear of the DECOR range of perforated and slotted acoustic panels.
- DecorSorb is factory laminated in a controlled environment ensuring consistency to the complete range of decorative acoustic panels manufactured by Decor Systems

FEATURES

- Extensively tested with excellent NRC ratings up to 0.80.
- Adds aesthetic value to the perforated panel.
- Lightweight and environmentally friendly, eliminating problems associated with “traditional” applications such as transport, handling, installation, etc.
- Acts as a barrier to dust and airborne particles.
- Fully fire retardant, complying with AS1503.3.

APPLICATIONS

- Clubs & Hotels
- Schools & Universities
- Shopping Centres
- Lobbies & Auditoriums
- Hospitals
- Libraries
- Indoor Sports Centres
- Sound Studios

NOISE CONTROL

- Please contact our Sales Office for test results on DecorSorb.
