As an innovative architect craving something truly different, we've got some very exciting news for you...

DecorLini

The days of limiting your creative vision to match the products locally available to you are over. Yes, it's official: regional market leader in acoustic wall and ceiling panels, Decor Systems – is now open for business in New Zealand.

We deliver state-of-the-art designs. Designs not previously available to the New Zealand market. Designs that light up the imagination. Designs that will not only complete your artistic vision – but enrich it.

At Decor we believe that anything is possible. Rich and ingenious sensory design has been our speciality for more than 40 years. While we are experts at refining the time-honoured classics, we are also passionate enthusiasts for projects that stand at the cutting edge of design. From bold, vibrant colours to glamorous, modern metallic and lustrous timbers – our versatile panels can be finished with an array of stylish surface finishes to make your designs the stuff of influential architecture.

MANUFACTURED LOCALLY RIGHT HERE IN NEW ZEALAND

Several products within Decor's comprehensive range will now be manufactured right here, in country. Among this distinguished local collection is Decor's biggest seller, the DecorTrend slotted acoustic panels.

Born from the most classic design element, the DecorTrend uses linear patterns to create an atmosphere of symmetry and calm. An excellent choice for traditional design, these timber panels can also be used in creative ways to produce the ultimate in contemporary minimalism.

Our local manufacturing team works passionately and meticulously so that we can deliver competitive prices at minimal lead times, and you can get your projects happening fast.

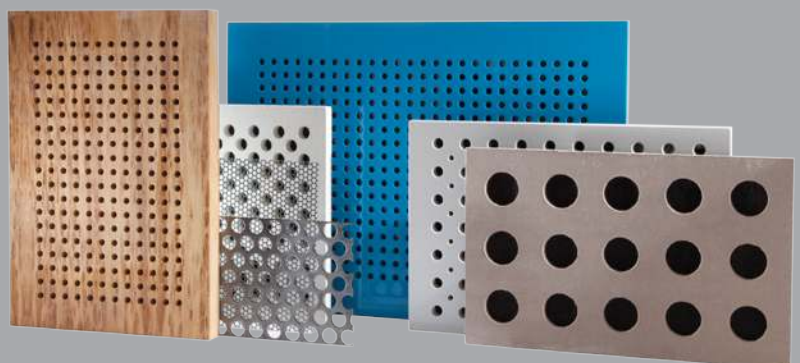

NEW TO MARKET

Designed with high traffic environments in mind, the DecorBoard perforated acoustic plasterboard minimises noise while assimilating beautifully into the built environment. Unlike other plasterboard panels on the market, size, borders, hole size and open area percentages can be tailored to suit design and acoustic requirements.

DecorLux perforated acoustic fibre cement panels boast a unique substrate that greatly enhances a building's acoustic ratings, while also maintaining a modern look. Round-hole perforations come in a variety of diameters – and the inspired choice between small or large holes can vastly shift the atmosphere of an interior.

STYLE THAT'S SUSTAINABLE

We are committed to serving both our customers and the environment we share together. We hold several peak body accreditations and our solutions offer maximum environmental ratings. Essentially, Decor leads the way for sustainable architectural outcomes.

CREATIVE COLLABORATION

Our mission is to nurture and support architects through the creative process, to ensure your vision is not only fulfilled, but exceeded.

The Decor website is a hub of inspiration which features interactive digital tools designed especially for the design industries.

If you find yourself brainstorming for creative solutions in a meeting, the tablet website is perfectly designed for collaborative thinking over an iPad. Similarly, if you are on-site or need technical information on the go, the mobile site offers a handy pocket-sized design resource.

SUPERIOR SERVICE

Decor is a long-established company – we have had the time to perfect our service over the course of three family generations. We can guarantee you same-day proposal, delivering quotes and specs to you in a matter of hours.

LET'S TALK

Want to chat? So do we. If you have any questions or want to see product samples – please get in contact. We are here to help.
