

PROJECT SHOWCASE

Morayfield Health Hub Medical Centre, QLD

An ambitious facility, the outcome is striking! The Decor Systems team worked collaboratively with the Cameron Chisolm Nicol design team to develop and produce the visually appealing wall and ceiling systems.

Bringing a sense of warmth and optimism, the timber flows through the building in a series of different patterns and effects inviting people to network and connect with their environs. With understated lighting effects, the peaceful and calm atmosphere is channelled through the complex.
