

PROJECT SHOWCASE

ST JOSEPH'S SCHOOL – NEW SENIOR CENTRE, PORT LINCOLN, SA

This new Senior Centre provides staff and students with a dedicated contemporary facility to encourage and facilitate modern education and provide a 'home' for senior students comprising a dedicated break-out area, general classrooms, tutorial spaces, Teacher Prep and versatile learning spaces.

The dedicated team of craftsmen at Decor Systems worked diligently to provide a modular system featuring mitre-jointed edging to the up-turns of these feature ceiling panels. Carefully assembled in our factory and delivered to a remote location in South Australia, the outcome is a testament to the design vision of the architects, the skill of the onsite installers and the Decor Systems artisans.
